SHEEP POX VACCINE, LIVE
ATTENUATED IP, FREEZE DRIED

SP VAC®

एसपी वैक

Composition

SP VAC® contains Live attenuated Sheep Pox Virus ('Srinagar 38/2000' strain) propagated on Vero cells.

- Virus titre: $\geq 10^3$ $TCID_{50}$ per dose
- Gelatine hydrolysate, sucrose, and lactalbumin hydrolysate added as stabilizers.
- Sterile Diluent: Each mL contains 0.85% w/v Sodium Chloride in water-for-injection.

Indications

SP VAC® is indicated for the prophylactic vaccination of sheep against Sheep Pox.

Clinical Signs of Sheep Pox

- Pock lesions all over the skin and ulcerations on mucous membranes
- Persistent fever
- Swelling of lymph nodes

Vaccination Schedule

- **Primary Vaccination:** At 3 months of age and above
- **Re-vaccination:** Annually
- **Use in Pregnant Animals:** Vaccination is not recommended during pregnancy.
